

IT'S WHAT YOU CAN'T SEE THAT MATTERS

HALYARD* AQUASOFT* NITRILE EXAM GLOVES **Macquarie University Hospital, 7TH – 11TH Aug**

HALYARD* AQUASOFT NITRILE EXAM GLOVES

AQUASOFT* Gloves are comprised of a unique nitrile formulation that provides users with both comfort and tactile sensitivity. They're ideal for use in applications needing superior tactile sensitivity and tasks which require the quality of nitrile, with added affordability.

38.2% less waste with SmartPULL* patented dispensing¹

Reduces waste, cost and contamination by ensuring only one glove is dispensed at a time and enables aseptic access to gloves even as the box empties.

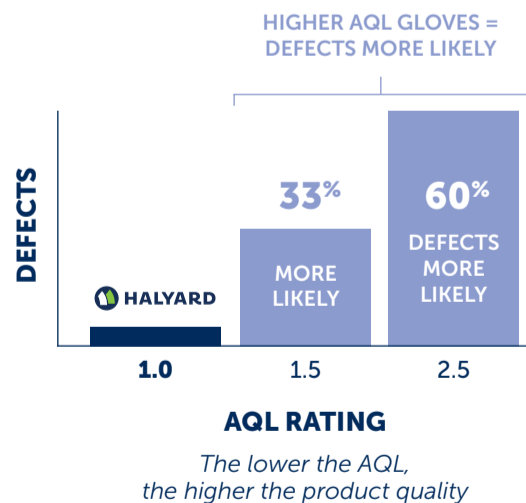

60% less likely to have defects due to an AQL of 1²

An important indicator of glove quality is AQL (Acceptable Quality Level).

LOW AQL = HIGH QUALITY

The lower the AQL, the higher the product quality and lower the incidence of pin-holes and other defects, which can create a barrier breach and ultimately lead to infection.

67% less storage space required with 300 count box³

AQUASOFT* Gloves are thinner than typical nitrile gloves which means they take up less storage space – each inner box contains 300 gloves – and they generate less waste.
